MARINE CORPS SYSTEMS COMMAND

EQUIPPING THE WARFIGHTER TO WIN

Mission

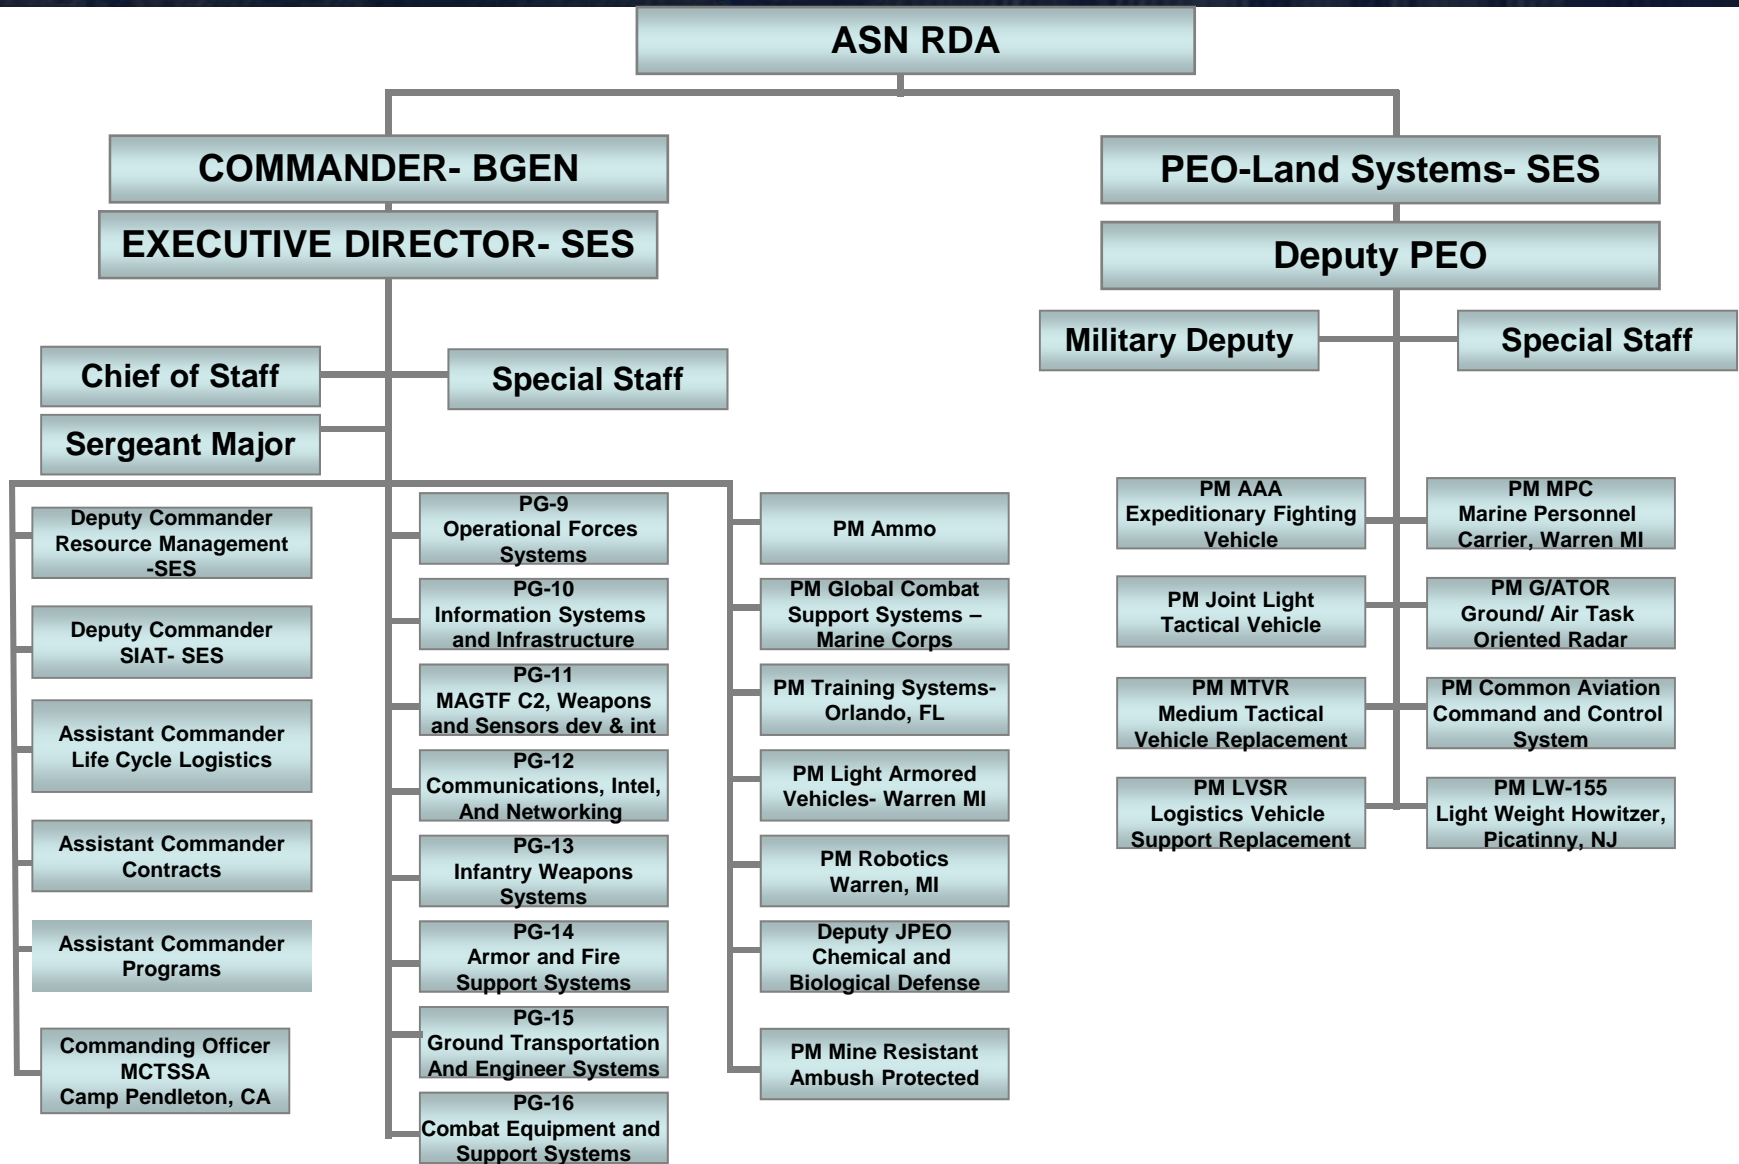

**We will equip and sustain
the Nation's expeditionary
"Force of Choice."**

- We're the Commandant of the Marine Corps' agent for acquisition and sustainment.
- We field systems and equipment used by the Marine Corps and joint operating forces to accomplish their warfighting mission.
- We manage the life cycle of MCSC acquired systems and equipment.
- We provide competency resources, policies and processes to PEOs and Program Offices.

What's New at Marine Corps Systems Command:

- [Command Magazine: Marines On Point \(Summer 2009\) - 10/6/2009](#)

First M-ATVs deploy to Afghanistan

With unprecedented speed, the first of thousands of Mine Resistant Ambush Protected (MRAP) All Terrain Vehicles (M-ATV) are being deployed to Afghanistan with a highly survivable and off-road-capable vehicle just three months after a delivery order was awarded to protect warfighters.

MRAP vehicles feature a V-shaped hull to deflect roadside bombs and are proven to be lifesavers on the battlefield. The procurement of the M-ATV grew from an urgent requirement to provide troops a smaller and more maneuverable vehicle that can travel off-road and navigate Afghanistan's difficult, mountainous terrain.

Admin & Press

“There is little that will sober an enemy more surely than the knowledge that somewhere, just over the horizon, lies a force of well-trained, well-equipped Marines in competently manned ships capable of delivering a stunning amphibious blow at a point and time of their own choosing.”

Lieutenant General, Victor Krulak, United States Marine Corps
